Champa Ceramics

Like a snowflake or a human face each hand made piece is perfect unto itself. Variations in color, texture and size resulting from the wood firing production method are like traits of an individual, portraying texture, subtlety and individuality.

Distinctive

Use these timeless vessels for planting, fountains, sculptural items or just for fun!

FOUNTAINS

The Tucana, Honeycomb and Apus can be used with our recirculating reservoir kits.

The kit includes a square fiberglass reservoir measuring 36”Lg X 36”Wd X 10”Ht, two covers and a center support for the urn. Adding a pump to the reservoir kit and urn will complete your recirculating fountain.

All three components are sold separately. They can be used indoors or outdoors when temperatures are above freezing. All plumbing hardware is included with the Urn, so all you have to do is assemble the pieces. Check with Champa for latest color availability.

The Hadir is sold with the ceramic urn and base only. The Capella is sold individually.
